

MR. ABDUL ALIYEV

8111 Loving Forest Ct,
Springfield, VA, United States
Mobile: (910) 670-9310
Email: abdul.aliyev3@gmail.com

Professional Work Experience:

Social Security Administration 6401 Security Blvd, Woodlawn, MD 21207 United States	IT Specialist (APPSW) (This is a federal job) 3/2022 - Present Hours per week: 40 Salary: 112,015.00 USD Per Year Series: 2210 Pay Plan: GS Grade: GS-13 Duties, Accomplishments and Related Skills: • Develop front-end web applications using React (front-end JavaScript framework) and USWDS design system • Develop and maintain a Node Express (JavaScript server) back-end with Drupal (Content Management System) integration • Build Drupal PHP backends, such as REST APIs, custom templates, configuration forms, etc • Work with Akamai CDN and Acquia CI/CD pipelines • Deploy Drupal site through sophisticated CI/CD tools, such as Jenkins, Acquia Site Factory and Akamai CDN • Participate in all phases of Software Development Life Cycle (SDLC) by gathering requirements, assisting with design, coding, writing unit, integration, and end-to-end tests, as well as providing an ongoing maintenance support My projects and highlights: <i>Eligibility for Benefits Screener:</i> • Built a web application for screening users for SSA related benefits. The questionnaire is a front-end app that is built with React and focuses on analyzing users' inputs to provide the best possible list of recommendations. Since the release of the questionnaire in mid Fall of 2022, the call volume has been reduced by at least 10%, and in-person office visits are showing a steady decline as the public is learning about the screener.
---	---

Social Security Card Replacement Questionnaire:

- Built the Social Security Card Replacement interactive questionnaire app that is designed to help users find the best options when it comes to replacing their Social Security cards. The app analyzes responses, and provides users with recommendations on how and where to request a replacement card.

Drupal UIs and Services:

- Developed RESTful APIs with Drupal RESTUI. Spearheaded the creation of RESTful APIs using Drupal RESTUI, delivering crucial SSA Office Location Search data to client-side applications. This implementation seamlessly integrated data, enhancing the overall user experience.
- Designed Numerous Drupal Templates. Contributed to the development of various Drupal templates, including calculators featured on SSA.gov, customized content editor UIs, and tailored configuration forms. These enhancements played a pivotal role in improving website functionality and user engagement.

Redesigned Top Navigation and Footer for all SSA.gov Pages:

- Revamped Navbar and Footer Design. Led the redesign initiative for the Top Navigation and Footer, implementing a modernized version using web components. Configured the new design to be universally applied across all SSA.gov pages through Akamai CDN. The result was a performant, accessible, and fully isolated Navbar and Footer, ensuring design integrity throughout the entire website.

Competencies:

Attention to Detail

I pay close attention to project requirements. I build diagrams and flowcharts to visually represent software application logic.

I study design mockups to understand all specifications related to design system. I review style guidelines that come from designers as well as one from a design framework.

Customer Service

My customers are my team and end users. I ensure that my customers receive the best service by prioritizing their needs

	above all. I'm always available for a chat. I use plain-language and a lot of patience when communicating with my customers. When providing customer service, my goal is to leave the customer better off and to do all I can to help them solve the problem. <u>Oral Communication</u> I make sure to listen first and fully understand the nature of oral communication. Then I target my responses to the individuals. When communicating about a software application or any other work related matter, I omit technical jargon and focus on trying to understand the issue at hand while using a plain language. <u>Problem Solving</u> When solving problems, I thoroughly research and gather all relevant information. I don't jump to conclusions, instead I analyze the available information and communicate with stakeholders. When I come up with a solution, I evaluate it by comparing with possible alternatives and pick the best option.
Booz Allen Hamilton 1201 Maryland Avenue SW, Washington, DC 20024 United States	Software Developer, Full Stack 04/2019 – 1/2022 Hours per week: 40 Duties, Accomplishments and Related Skills: • Developed full-stack web applications with JavaScript frameworks React, Vue and Node • Built apps that were user-centric and designed with performance and accessibility in mind • Worked with different types of data sources, such as relational Postgres and MySQL and documents based MongoDB databases as well as various Content Management Systems, such as Drupal, Contentful, and WordPress • Wrote robust unit and integration tests to ensure that each component is flawless and to expose faults in the interaction between integrated units • Followed Agile Scum leadership best practices when developing software • Documented information that relates to applications on Confluence and Readme files • Worked within cross-functional team of developers, testers, content creators, as well project managers and government clients My projects and highlights:

	<i>NASA, Sub-Orbital Order Tool:</i> - Fully built user authentication with oAuth Earthdata service. The feature consists of backend Node API, front end with Vue JS, as well as Postgres database sessions management. Since the feature has been introduced, ASDC, the managing agency, received a number of positive reviews from end users, and got approved to develop additional features based on the success of newly build user authentication. - Developed faceted search filters to allow users find the exact data items to download. This new faceted search filter significantly improved the efficiency of user downloads, reducing the number of bulk downloads by half and it continues to receive great user feedback. <i>DOL, Benefits.gov, GovLoans, and SSA BEST:</i> - Complete redesign of legacy applications Govloans and SSA BEST. Rebuilt the apps with an extremely efficient framework for static site generation – Gatsby JS. Built the apps following application best practices, making them efficient, fast, responsive, and accessible. Newly resigned sites continue to receive great user feedback, and since the redesign, the sites popularity grew exponentially from on average of 10k people per month to over 200k. - Introduced a help center and chatbot features to Benefits.gov. Both features I have built to provide the most useful information to the users. Ever since the new help center and chatbot have been brought to our site, the number of user emails went significantly down, roughly from on average 2000 per months to less than 300. This was due to the fact that the new help center design was much easier to navigate, and the custom built chatbot with cognitive capabilities is able to find many of the answers users are looking for. - Introduced user authentication to Benefits.gov by leveraging Login.gov service. This feature is aimed at providing users with more custom experiences and capability to store various search results within their accounts. <i>DOL, Office of Administrative Law Judges:</i> - Took part in the development of search feature overhaul by implementing Azure’s Cognitive Search which as of GA reports from August 2020 achieved a 40% increase in the usability and customer satisfaction of the web site's searching capability.
--	--

	<i>DOL, Foreign Labor Application Gateway:</i> Contributed to a major re-design of application suite. Redesigned application helped expedite the processing time for cases from 12-16 months to 10-14 months. Also, it significantly improved uptime of the website during the busiest seasons.
Department of Homeland Security 1401 South Clark Street, Arlington, VA 22202 United States	Program Analyst (IT Ops) (This is a federal job) 10/2017 - 04/2019 Hours per week: 40 Salary: 57,000.00 USD Per Year Series: 0343 Pay Plan: GS Grade: GS-9 Duties, Accomplishments and Related Skills: - Developed help desk tickets tracking application using Oracle Apex, PLSQL, and Angular JavaScript framework - Worked in an IT helpdesk environment assisting 400+ users with web applications related issues on a daily basis - Was responsible for gathering application requirements and keeping track of agile software development processes - Worked closely with the UI design team to ensure the best user experience with the company's applications - Diagnosed and resolved software application problems in response to customer-reported incidents - Assisted customers in installing, configuring, and troubleshooting desktop systems and commercial off-the-shelf software
Department of Interior 45600 Woodland Road, Sterling, VA 20166 United States	Program Assistant (This is a federal job) 02/2016 - 10/2017 Hours per week: 40 Salary: 46,000.00 USD Per Year Series: 0303 Pay Plan: GS Grade: 07 Duties, Accomplishments and Related Skills: - Built interactive courses using Claro CMS, jQuery, and custom HTML, CSS, and JavaScript - Build interactive Excel reports with Visual Basic - Designed and distributed newsletters using Adobe Creative Suite applications
